
Are solar panels suitable

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Are solar panels a good option for your home?

Residential solar panels allow you to pull less energy from the grid. With the addition of solar batteries, solar panels could make your home self-reliant and independent from the electric grid. Solar batteries store energy created during sunny hours, allowing it to be used at night or on cloudy days.

Are solar panels worth it?

Solar panels are also a great source of clean energy. According to Columbia University, solar panels lower carbon emissions per acre than trees! Solar panels also reduce reliance on fossil fuels and help you live more sustainably. With solar, you can go green and keep the green in your wallet -- sounds worth it to us! Are solar batteries worth it?
