# Castries Solar PV Tile Installation

How do I install a photovoltaic system?

Follow along with the essential steps of photovoltaic systems installation, from mounting solar modules and connecting to the grid, to commissioning and regular maintenance for optimal performance.

How to install solar tiles?

Use stainless screws (supplied). Remember to use Hole 1 depending on the stringing layout. Remove the diagonal foam strip (not shown here) from the tile by the roof edge. Use white spirit not required. Ridge Tile Fitting. The way the solar tiles lap means that there is a significant step at the ridge.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How do you install solar panels on a roof?

These are fixed to every second batten just above the support bars as shown. Use two screws to maximise the solar coverage. If the roof doesn't end on a whole tile then supply blank tiles for cutting. These may be cut with a woodworking saw, and mounting and replacing individual tiles. Use pliers to remove the 3
