## Does every township have an energy storage power station

Could a battery storage facility make Michigan electricity more affordable?

A battery storage facility would add capacity to the power grid in Southwest Michigan and make electricity more affordable, a representative from NewEdge said through a communications firm representing the company.

Will Comstock Township rescind energy storage moratorium?

Bell referenced a moratorium in Comstock Township passed after a different company proposed building an energy storage facility. Comstock Township is considering rescinding that ordinance, according to the township board agenda.

What are battery storage power stations?

Battery storage power stations are usually composed of batteries, power conversion systems (inverters), control systems and monitoring equipment. There are a variety of battery types used, including lithium-ion, lead-acid, flow cell batteries, and others, depending on factors such as energy density, cycle life, and cost.

What if a township passed an ordinance or a moratorium?

Therefore, even if the township passed an ordinance or the moratorium, companies can supersede the township and request approval from the state, Porter said at a prior meeting. Trustee Zak Ford, who was against the moratorium, said his primary concern was the use of lithium in BESS facilities.
