## Double-row flexible solar panels

What is double-row flexible photovoltaic support?

Double-row flexible photovoltaic support is a new type of structure that has excellent site adaptability and cost-effectiveness. However, methods for calculating wind loads of such structures are missing in the current standards or codes.

How inclination affect the wind pressure distribution of double-row photovoltaic panels? The parameters of double-row photovoltaic panel were analysed by CFD numerical simulation. The wind pressure distribution of double-row photovoltaic panels is greatly affected by the inclination angles of panels. Double-row flexible photovoltaic support is a new type of structure that has excellent site adaptability and cost-effectiveness.

Does double-row photovoltaic panel reduce wind pressure?

The wind pressure distribution characteristics of double-row photovoltaic panel were studied by wind tunnel test. The uneven wind pressure coefficient is introduced to explore the reduction of wind pressure of double-row PV panels. The parameters of double-row photovoltaic panel were analysed by CFD numerical simulation.

What are flexible solar panels?
