# **Empowered Solar-Powered Containerized Automated Bridge for Victoria**

What is Bendigo's new hybrid solar system?

The hybrid installation integrates photovoltaic (PV) solar generation with a battery energy storage system (BESS) in Victoria. Located 20 km east of Bendigo, the project will have a generation capacity of 140 MW (AC) of PV solar energy and a 50 MW/100 MWh battery storage system, capable of two hours of operation.

What is a hybrid microgrid?

BoxPower's hybrid microgrid technology combines solar, battery, and backup power into a modular platform designed for remote and resilient energy.

What is a boxpower solarcontainer?

BoxPower's flagship SolarContainer is a fully integrated microgrid-in-a-box that combines solar PV, battery storage, and intelligent inverters, with optional backup generation. Designed for reliability and ease of deployment, the SolarContainer is ideal for powering critical infrastructure, remote facilities, and commercial operations.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
