
Indonesia PV Inverter Quote Scheme

Are rooftop solar PV system development quotas achievable in Indonesia?

The rooftop solar PV system development quotas present an ambitious target, but there are some challenges to reaching this goal. As of 2023, renewables only accounted for 13.1% of Indonesia's energy mix, below the target of 17.9% by 2023, according to the country's Ministry of Energy and Mineral Resources (MEMR).

How many solar PV quotas are there in Indonesia?

Indonesian think tank Institute for Essential Services Reform (IESR) says the total rooftop solar PV quotas in 11 power systems between 2024 and 2028 consist of 5,746MW of new capacity, which can be divided into annual quotas of 901MW for 2024, 1,004MW for 2025, 1,065MW for 2026, 1,183MW for 2027, and 1,593MW for 2028.

What is Indonesia's quota for rooftop solar in 2024-2028?

In June 2024, Indonesian authorities issued a quota for the development of rooftop solar systems by the state electricity utility PLN for the period 2024-2028, aiming to add 5.75GW of installed PV capacity to the country.

Will PLN change the rooftop solar PV market in Indonesia?

Since nearly all Rooftop Solar PV systems in Indonesia (particularly those involving PLN) currently operate on a net-import basis, in practice, the impact of this change on the existing market should be relatively minimal. Nonetheless, this is a new restriction on the future potential of the Rooftop Solar PV sector in Indonesia. 3. Capacity Charge

On 31 January 2024, the Indonesian Ministry of Energy and Mineral Resources (MEMR) issued a new regulation governing the installation and operation of private rooftop ...

The pv inverter market in Indonesia is expected to reach a projected revenue of US\$ 325.3 million by 2030. A compound annual growth rate of 18.7% is ...

The pv inverter market in Indonesia is expected to reach a projected revenue of US\$ 325.3 million by 2030. A compound annual growth rate of 18.7% is expected of Indonesia pv inverter market ...

Indonesia solar inverter market estimated to grow at a solid CAGR during the forecast period propelled by governmental support, growing electricity needs, along with the decreasing price ...

Indonesia has the potential to install 3.3TW of solar capacity, according to the

government, but several obstacles need to be tackled.

Indonesia issues MEMR Reg 2/2024, new regulation on rooftop solar power plants. Key provisions include quota system for IUPTLU holders, removal of capacity charges and net ...

Introduction Following the issuance of Minister of Energy and Mineral Resources (MEMR) Regulation No. 2 of 2024 (MEMR 2/2024) earlier this year as the new regulatory ...

If a rooftop solar system is found to be operating and connected to PLN's network without PLN's approval, PLN will send a notice to disconnect the ...

Indonesia solar inverter market estimated to grow at a solid CAGR during the forecast period propelled by governmental support, growing electricity ...

In June 2024, Indonesian authorities issued a quota for the development of rooftop solar systems by the state electricity utility PLN for the period 2024-2028, aiming to add ...

4. Quota for Rooftop Solar PV Development Under the new regulatory regime, IUPTLU holders must establish a five-year quota for development of Rooftop Solar PV ...

If a rooftop solar system is found to be operating and connected to PLN's network without PLN's approval, PLN will send a notice to disconnect the rooftop solar system from its network and ...
