
Maintain the location of the battery cabinet

Where should a battery cabinet be installed?

Battery cabinets may be installed adjacent to the UPS or in a separate location. If the battery cabinet is installed adjacent to the UPS, the recommended installation location for the battery cabinet is on the right side of the UPS cabinet. This location will allow for future expansion using an external module. Cabinet

How do you protect a battery cabinet?

High-quality cables, connectors, and terminals establish safe electrical connections between battery cabinets and other system components. And add appropriate fuses and circuit protection devices to the circuit to prevent overcurrent, overvoltage, and short circuits.

How do you level a battery cabinet?

Lowering the leveling feet until the cabinet is not resting on the casters. Ensure the cabinet level and matches the height of the first installed battery cabinet. **NOTE** Two cabinet joining brackets are provided for securing each cabinet at the top and bottom. A flat bracket joins the top of the cabinets and a larger flat bracket joins the cabinets

How do I connect a battery to a cabinet?

For connection requirements, see paragraph 3.2.3 on page 15, Table 4-1, and Figure 4-8. In the first battery cabinet, locate the battery-cabinet-to-battery-cabinet Shunt Trip and Aux battery interface cable with connector P3. Route this connector into the next cabinet and mate with the matching J3 connector in that cabinet (see Figure 4-8)
