# Outdoor Power Target Field

What is a power stop field target?

Sale! Built for the competitive field archer, the Power-Stop Field Target 48-123 is a large-scale, high-density layered polyethylene foam archery target built for competition or home use. The Power-Stop Field Target features a convenient replaceable 23-inch center foam core for extended target life.

What is field target shooting?

Field Target (FT) shooting is a popular precision airgun competition that combines marksmanship, mental acuity, and outdoor skills. Originated in the UK in the 1980s, it has grown into an internationally recognized sport where competitors engage metal targets at varying distances with 10 to 55 yards.

Do you need high-power lighting for an outdoor archery field project?

And it is even part of the Olympic Games. If you want to do an outdoor archery field project, high-power lighting for the entire field is one of the essential pieces of equipment. To ensure that archery competitions can be held safely and effectively, proper lighting must be installed on the outdoor range.

What ring/mount should I use for Field Target Competition?

High or medium rings/mounts are recommended for large objective lens dia and comfortable heading position, which is significant for Field Target Competition. A bubble level ensures the scope is level/parallel, which helps provide accurate distance readings. Usually you wouldn't change the magnification during the competition. SFP is preferred.
