## String type 196kw inverter

What is a three-phase string inverter system?

Three-phase string inverter systems convert the DC power generated by the photovoltaic (PV) panel arrays into the AC power fed into a 380 V or higher three-phase grid connection.

What is a sun2000 solar inverter?

This document describes the SUN2000- (196KTL-H0,200KTL-H2,215KTL-H0) Series in terms of their installation,electrical connections,commissioning,maintenance,and troubleshooting. The SUN2000 is a three-phase grid-tied PV string inverterthat converts the DC power generated by PV strings into AC power and feeds the power into the power grid.

What is a 3 phase inverter system?

A three-phase inverter system is operating at an output power level ranging from 10kW to above 300kW,used in commercial and decentralized utility-scale applications. High output power can be realized through stacking multiple medium-power blocks.

What is the power rating of an inverter?

The power rating of these inverters ranges from 10kW up to more than 250kW(realized through stacking multi-modules),covering different markets and applications,ranging from residential to commercial or industrial up to utility-scale.
