## The latest news on solar container battery companies in Rotterdam the Netherlands

Where is the Netherlands' largest stand-alone battery energy storage system located? Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS). This groundbreaking 45MW/90MWh utility-scale BESS will be located in the port area of Dordrecht, on a 6000m<sup>2</sup> site and will be used for grid stabilization by storing excess energy from renewable sources.

Will Eneco and EP NL invest in a battery storage project?

The storage project will make use of the plant's existing grid connection. But while making the announcement, the two companies were vocal about costly obstacles in the Netherlands for batteries. Eneco and EP NL have announced a joint investment in a 50 MW /200 MWh battery storage project at the Enecogen power plant in the port of Rotterdam.

Is this Eneco's first battery in the Netherlands?

At the same time, it's a shame that this is only Eneco's first own battery in the Netherlands," said Karen de Lathouder, COO Assets at Eneco. "We are still miles away from achieving the battery capacity required in the Netherlands to prevent power shortages and grid congestion, as well as reducing emissions from our energy system sufficiently.

How will enecogen & EP NL handle battery development in the Netherlands?

Enecogen will handle the battery's maintenance and operations, while the trading departments of EP NL and Eneco will control its deployment. No financial details were announced. In the announcement, the companies noted that battery development in the Netherlands lags behind other European countries, citing grid fees as a primary obstacle.

You simply add another unit. This makes the solar battery container an ideal choice for businesses that anticipate growth but don't want to over-invest in infrastructure on ...
