
The latest regulations on hybrid energy access fees for solar container communication stations

Are solar-based renewable generating stations reclassified as restricted access?

Solar-based REGS or renewable hybrid generating stations (RHGS) combining solar energy with another source, including ESS, will be reclassified as entities with restricted access for their non-solar capacity during non-solar hours.

What does "restricted access" mean for regs and energy storage systems?

The Central Electricity Regulatory Commission (CERC) has proposed amendments to the 2022 regulations, introducing "Restricted Access" for REGS and energy storage systems. This limits scheduling rights to solar or non-solar hours, aiming to enhance grid management and optimize the use of inter-state transmission infrastructure. March 06, 2025.

When will a solar-based regs be classified as a restricted access entity?

Furthermore, any solar-based REGS or Renewable Hybrid Generating Station (RHGS) with prior connectivity approval will be automatically classified as an entity with restricted access after three months of the amendment's enforcement, unless it applies for additional capacity.

What does CERC's "sharing of inter-state transmission charges & losses regulations" mean?

By EI News Network The Central Electricity Regulatory Commission (CERC) has notified the fourth amendment to the "Sharing of Inter-State Transmission Charges and Losses Regulations, 2020," introducing key updates aimed at promoting renewable energy, battery storage, and green hydrogen projects.

A new clause (q-i), "Entities with Restricted Access," has been added, referring to Renewable Energy Generating Stations (REGS) or Energy Storage Systems (ESS) whose ...

European Commission publishes the EU Grids Package with new guidance and proposed amendments to speed grid buildout, streamline permitting, and prioritise grid-friendly ...

The European Commission has also made the long-overdue move to introduce targeted permitting legislation for energy storage. This means that Europe will be able to ...

The Central Electricity Regulatory Commission (CERC) has issued the Draft Fourth

Amendment to the Connectivity and General Network Access to the Inter-State Transmission ...

The ISTS Amendment Regulations permit REGS (wind, solar, or hybrid), RHGS (wind-solar hybrid), or Battery ESSs eligible for waiver of the ISTS charges (Eligible Projects), ...

The Central Electricity Regulatory Commission (CERC) has come up with tariff regulations for renewable energy projects. These regulations will come into force from July 01, ...

A major highlight is the extension of transmission charge waivers for renewable energy generation stations (REGS) based on wind, solar, or a hybrid of both. Projects ...

The Central Electricity Regulatory Commission (CERC) has issued the Fourth Amendment to the 2020 regulations governing the sharing of interstate transmission charges ...

The Central Electricity Regulatory Commission (CERC) has issued the draft (Connectivity and General Network Access to the Inter-State Transmission System) (Fourth ...

The Central Electricity Regulatory Commission (CERC) has amended the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020, waiving ...

In the contemporary energy landscape, the solar container has emerged as a significant and evolving innovation, gradually shaping the future of energy supply and ...
