
Tiraspol Folding Container Low-Pressure Type

What is a platform container?

A platform container is a type of container that resembles a railway flatcar. It has a floor with a high bearing capacity, without a superstructure, and is suitable for overweight (up to 40 tons) and super long cargo (LxWxH: 6x4x4.5m). 80 tons of cargo can fit in a 2-connected platform container.

What is the temperature control range for Hapag-Loyd containers?

Hapag-Lloyd offers containers with temperature control ranges from -35°C to +30°C in ambient environments up to 50°C.

What is a GP container?

GP, or General Purpose, containers are the most widely used container type, occupying almost 70 - 80% market share. They are used to ship general cargo, including cultural goods, daily necessities, medicine, textiles, handicrafts, chemical products, hardware and electricity, electronic machinery, instruments, and machine parts. However, they cannot be used to transport frozen goods, live animals, and plants.

What is a hardtop container?

A hardtop container is a container with a solid, removable hardtop made of steel. Unlike open-top containers, it has a hardtop with rubber fillers around the top, providing the same water resistance as general purpose containers.
