
Watts Uninterruptible Power Supply

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is a device that provides emergency power to connected equipment when the main power source fails. It offers immediate protection from power interruptions by supplying power from a separate source, typically batteries.

1. Standby UPS 2. Line-Interactive UPS 3. Online/Double-Conversion UPS

What is a wattbox ® uninterruptible power supply (UPS)?

The WattBox® Uninterruptible Power Supply (UPS) is packed with features to help keep vital equipment up and running in the case of power loss. This Pure Sinewave UPS provides 8 outlets of battery backup and full automatic voltage regulation (AVR) to prevent costly interruptions, as well as a "Graceful Shutdown" of a connected PC via USB port.

What is 600va/300 Watts uninterruptible power supply (line interactive UPS)?

600VA/300 Watts uninterruptible power supply (line interactive UPS) is cost-effective battery backup for the loaded equipment like PC, with input & output voltage of 220V or 120V AC for options, compact size, LCD display, strong overload protection. Favorable price, high reliability and great performance.

Can I use ups if the power requirement exceeds wattage?

Yes, as long as the total power requirement of all devices does not exceed the UPS capacity. Always calculate the total load and choose a UPS that can handle the combined wattage. Save my name, email, and website in this browser for the next time I comment.
