Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO4 power stations will last for more than 3,000 charge cycles, or about 10 years.

What is the best portable power station for backup?

Anker Solix F1200 (1,229Wh): This unit was previously known as the PowerHouse 757 from Anker, and was also CNET's previous pick for "best portable power station for backup." Its UPS mode was one of the earlier units to boast "less than 20ms" switchover time in the event of a power outage. It's also currently \$500 off on Anker's site.

Why do you need a portable power station?

Why Trust Us? Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and phone while working remotely. They're effectively large bundles of rechargeable lithium-ion batteries, which provide a quiet, exhaust-free alternative to noisy gas-powered portable generators.
